Love your **Haus**

Welcome to Haus Glass

We're a small, family run business that offers a professional, perfectionist and personal service for your glazing projects.

We started out ten years ago as The Bifolding Doors Company, and have since gone from strength to strength, installing hundreds of bi-folding doors throughout the country. As Haus Glass, we've broadened our product range to include aluminium window, glass roof and sliding door systems.

We take pride in our experience, friendliness and ability to deliver on your demands. Whatever you require, quality and style comes guaranteed.

Two pane bifold door as an alternative to a french door

Bi-folding doors *Space to entertain...*

Bi-folding doors can add magic to any home extension, new build or renovation. You can create a bright and versatile space that brings the outside into your indoors, creating a seamless link between internal and external lifestyles.

Our doors come in a standard range of popular colours that can be supplied and installed within a very quick lead time. We also offer a bespoke colour range, giving you the choice to powder coat your doors in a finish that suits your interior or exterior design scheme.

Haus NORDIC

DUTEMÄNN FD85
exceeds expectations

Removable corner post option also available. For specific product details on our bifolding door range ask for our specification files.

These British and German doors are engineered so that the weight is distributed to the bottom tracks, giving you an effortless glide motion. Slim and pleasing profiles and fashionable colour coded or stainless steel hardware means they really are the most desirable doors on the market.

There is a range of glazing options from 24mm, 28mm, to 32mm either using double glazed or triple glazed specifications, incorporating the most up to date of glass technology.

All our units use Low E energy-saving glass with Argon gas filled cavities and a warm edge space bar technology. This allows us to achieve excellent U Values that can be tailored to your project needs. For privacy, why not pick from our stylish integral blinds whether remote or manual.

Haus Glass introducing the RK entrance door systems

RK Door Systems specialises in the supply of highly insulated aluminium entrance doors that offer exceptional performance combined with contemporary designs.

Using precision German technology we have developed a selection of contemporary entrance doors that offer extremely low maintenance with wipe clean surfaces and through their rigid construction will not warp or bow.

Each design is available in a range of specifications and finishes and combined with their modern and unique designs they will make a stunning entrance to any building. Our range of doors suit every style and budget, starting with the Entré range for the cost conscious buyer through to our stunning Pivot doors with unique finishes for the ultimate entrance.

Key features

- PAS24 certified & Secured By Design accredited
- 10 Year Warranty
- Fully flush profile internally and externally
- Bespoke and flexible design options with oversize doors available
- All doors manufactured in the same factory using high quality German components
- All doors with glass are triple glazed with laminated security glass as standard
- 180 degree concealed hinges available
- Excellent Google reviews
- Amazing thermal performance U values from 0.95 down to 0.67
- Easy to clean wipe down surfaces with removable trims to conceal all fixings which are stainless steel as standard
- Single frame construction
- Available in specialist metallic finishes such as Antique Textured Bronze and Rustic Steel

Sliding door systems

If you are looking for a true hygge lifestyle, then your choice is clear. We can provide an effortlessly moving glass wall that creates style, light and contemporary modern living. That means you can enjoy wonderful views from the comfort of your home whatever the season.

Our doors boast an excellent maximum sash width of 3.35 metres and 3.2 maximum height. State of the art glazing options mean you enjoy the ultimate glass room experience.

‘HYGGE’ *A warm, cosy and homely atmosphere*

We offer a standard range of popular colours and a bespoke colour range. You also have the choice to powder coat your doors in a finish that suits your interior or exterior design scheme.

The handle system uses a lift and glide built in motion. This means you can choose to open the door as little or as much as you like. The simple turn of a handle lifts large panes with ease from the durable stainless steel track and panes can be moved to an opening to suit you.

Introducing our new premium sliding door range - **The Sunflex SVG30**

Our Sunflex aluminium sliding doors offer a dynamic stylish look and maximises the light into your room, whilst releasing the potential of your view. With our new ungraded ultra slim SV30 it has an incredible slim interlock sightline of just 30mm.

The advance technology of the SVG30 means that unlike other slim frame sliding doors like our Haus Infinium, there is no requirement for large reinforced profile sections that can extend to 150mm from the face of the frame, which reduces the sightline of the system when viewed from an angle.

We also offer a stylish stainless steel feature handle for a modern and contemporary look. Alternatively we can also offer a recessed handle option which is set into the frame of the doors to allow flush stacking of your sashes.

With regards to security - anti-lift blocks prevent the panels being levered from the tracks. With a full height thermally broken claw lock at every meeting section ensuring the panels cannot be pulled apart.

Toughened glass unit used as standard, but can be upgraded to laminate security glass on the outer pane which then achieves PAS24 the requirement for the latest Document Q Regulations.

Our other available systems...

Reynaers CP130

Key features

- Twin and triple track option
- Open corner option available
- Smooth lift and glide movement
- Slim 68mm interlock on 2 pane option - 98mm as standard for other configurations

This system not only glides smoothly, it also boasts industry leading maximum door sizes, making it our most popular sliding door.

Haus Infinium SV35

Key features

- Twin and triple track option
- Intermediate interlock/sightline of just 35mm
- Structurally bonded on site for increased strength and weather performance

This system sits in the middle of our sliding door range and offers the best of both worlds, ie upgrade to stainless steel bar handles and with its slim interlock at an achievable price than our Sunflex Premier range of sliding doors.

New Haus Heritage windows & doors

If you are wanting to replace or add a traditional window and door system to a property that deserves something a bit more special than your average – then look no further than our Haus Heritage Window and Doors Collection.

Our Haus Heritage architectural system, is designed to replicate a Crittall / metal style, with the heritage windows and doors being well designed and suited for any period or traditional property. Incorporating modern aluminium window technology with traditional design, our heritage windows would look fantastic in any home, whether art deco, industrial, townhouse, conservation areas or quite simply in a modern apartment or family extension.

Achieving high security and excellent U Values, our heritage aluminium windows are an excellent choice.

Haus Heritage can also be used as internal doors and dividers due to the slim profile dimensions and they come in a great choice heritage aluminium style.

What do you see through your windows today...

Aluminium windows

Your choice of windows and the proportions of the opening can radically affect the personality of your home and the daylight you enjoy.

Aluminium windows are quickly becoming very fashionable in both traditional and modern buildings. Our stylish aluminium casement windows are thermally broken and use efficient glazing to create excellent U values. With high security locking systems, and the appeal of our range of powder coating options, these really are the most stylish windows on the market.

When ordering windows for a new build or an extension, lead times are important. Here at Haus Glass we can move your project forward quickly with our exceptionally fast service.

We offer two ranges of windows systems to suit different styles of property and budgets. Our windows come in all shapes and sizes - from gable triangular frames which can be incorporated with bi-folding or sliding doors, to large curtain wall 'feature' windows.

Aluminium offers you all of these options as it is strong, durable and designed and engineered to make your windows bigger, yet sleek in design.

- Arrised edges

Aluminium roof systems

At Haus Glass, we have won numerous awards for our innovation, design and stylish glass structures. Winners have included a traditional lantern for an orangery effect and a bespoke roof structure that can be designed to suit any opening.

We offer a range of standard lantern and flat roof modules that can be supplied direct or installed by ourselves.

Recently we have introduced highly popular modern and contemporary flat glass roof lights. These create light and a real focal point and your home.

With its ultra-slim profile, the flat rooflight perfectly complements our aluminium windows and bi fold door systems. The rooflights are perfect for any contemporary or industrial style extension or new build and are a superb centrepiece for any room.

Example section drawing for 1000 x 1000 roof (other sizes available)

Industrial

This old terraced property in Chester required more living space. Our clients instructed a local architect and builder to design and build a modern contemporary kitchen dining extension.

They wanted to complement the style of the original Victorian property with features such as exposed brickwork, steel and our glazing. This really does capture the industrial look that's very popular with urban dwellers. Our new stylish Haus Glass flat roof was incorporated,

RAL 7016

bringing endless amounts of light and sky into this fantastic kitchen living space and, because of its flat design, the roof stays discrete from the outside.

Grey aluminium windows were installed as a feature at ceiling level, creating an element of height and space, flooding light into the room below. With our stylish and secure grey RAL 7016 bi-folding doors, this space can be opened up when entertaining on long summer evenings.

Modern Contemporary

This modern house in Bowden, Cheshire had a complete Haus Glass makeover with our aluminium flush casement slate grey windows, Haus Entrance door and bi-folding doors. These elements open up the whole of the house at the rear.

This is a great example of how you can turn a tired looking home into a contemporary masterpiece of design.

Glass Space

If you are looking at adding a stylish, sophisticated contemporary living space in addition to your home, then look no further than what we have achieved in the heart of Cheshire.

With our bespoke aluminium roof structure, which captures and draws the light from above, along with the bifolding doors when fully open truly access all of the colours and ambience of the garden.

After meetings with our client, we provided designs, ideas and inspiration which led to the final project specification.

Imagine yourself on a warm summers evening with a glass of wine in this beautiful, contemporary glass garden room.

RAL 7016

Rural Affair

RAL 7016

A beautiful modern extension on a traditional house set in the heart of the Lancashire countryside.

This unique extension has a real 'hygge' feel about it, with natural Anthracite Greys and traditional stone colourings, incorporating a wood burning stove creates a cosy, modern and stylish extension. With the additional of our Haus Heritage internal door set completes this contrast of modern and old traditional building rather well.

We have had a great relationship with the team ever since we began supplying them in 2011. Due to their focus on providing quality installation and top class customer service they have become an accredited Origin partner with a trade rank of Gold, the best available. In 2015, they deservedly won our award for Best Northern Trade Partner and have continued improving ever since.

Andrew Halsall, Managing Director
Origin

Davenport Architecture have used and specified Haus Glass on a number of projects across the North West. The service and quality of installation provided by the Haus Glass is excellent and delivered to an extremely high standard. The systems and products offered by Haus Glass are of outstanding quality and offer flexible solutions to both simple and complex projects.

Jamie Davenport, Director
Davenport Architecture

Haus Glass provide an excellent service from start to finish every time. We have engaged Mark and the team on a number of our more bespoke projects and they have provided a very high quality product to meet with our client's demands. I would not hesitate to recommend Haus Glass.
